Discover Citipointe
Welcome to Citipointe

At Citipointe we are called to excellence in education. It is God who calls us to excellence: in the way we live and learn, and in our service to Him and others.

In our quest for excellence we integrate faith and learning holistically, to empower students with the values and foundations that will allow them to flourish and serve God and the wider community.

True education has a worth far beyond exam marks in developing the intellectual, spiritual, emotional, social and physical potential of each student. Our students should feel valued and connected as they take opportunities to lead and follow, to ponder and wonder, to succeed and to cope with setbacks.

Our students share the leafy Citipointe campus with Citipointe Church, Citipointe Childcare, and Christian Heritage College (higher education): a wonderful space to engage their minds, and to play and relax while growing to be confident, caring and connected.

We invite you to visit our College and experience the warmth and vision that is uniquely Citipointe.

Headmaster
Imagine what they’ll experience.
Our school facilities

Citipointe has primary and secondary on one campus, where our facilities are intentionally designed to meet students’ changing developmental needs.

In primary (Prep to Year 6), our focus on discovery and development is seen in three distinct zones: Prepworld, Year 1 Centre, and the Quad for students from Years 2 to 6. We also support creativity through dedicated art, library and music centres.

The secondary school (Years 7–12) built environment reflects our expertise in technology, learning extension, STEM*, music, the arts and languages.

Both schools benefit from our extensive sporting facilities, including an eight-lane, 400-metre running track, multi-purpose College Hall, 25-metre covered and heated pool, and outdoor fields and courts.

Citipointe Church’s facilities are also ours to share, including a 2500-seat main auditorium, a smaller auditorium and chapel.

*Science, Technology, Engineering and Mathematics.

Imagine a school where there is room to move... and run... and play.
Citipointe’s learning culture is a unique and seamless integration of faith and learning.

By holding the two in balance, we seek to develop a Christian worldview in our students that values the Bible as authoritative and the teachings of Jesus as encouraging excellence, openness and inquiry. We value and support our partnership with students’ families and churches.

Our learning philosophy means our students can experience deep academic challenge, the freedom to try again, and programs of learning extension, learning support and vocational education.

We understand each family is different, and that the children within each family will have unique gifts. Through our faith and learning culture, we design our students’ learning to support every child and to prepare them for the challenges that lie ahead in their future study and careers.

Imagine what a difference holistic learning could make.
Curriculum

From the earliest days of first discoveries to preparing and releasing our oldest students for tertiary study and careers, Citipointe holds close the importance of challenging and nurturing every student.

Developmentally aligned schools allow us to tailor learning to students’ abilities, and offer greater subject choices and opportunities for exploration as they progress.

We understand every student is unique, and through our curricular offerings seek to provide an opportunity where every child can succeed. That means a careful balance of academic and vocational subjects in the senior school, ESL*, student support, and learning enrichment programs from Prep onwards.

For more than a decade, Citipointe has also been a leader in extending high-performing students, with multiple extension opportunities integrated throughout the College.

*English as a second language

Co-curricular

We offer students a rich array of co-curricular opportunities.

Sport plays a vital role in the education, health and wellbeing of our students, from skills-building sport in the early primary school years through to district and inter-collegiate competitions from Year 4 onwards.

We are well known for our excellence in the arts, including a superb Academy of the Arts, in-school tuition and extensive performance calendar. Through NOVA Arts, gifted Years 10–12 students receive specialist arts extension.

Global Academy – our international student outreach program – enables students to build an informed worldview through international collaboration and academic experiences.
Pastoral care and wellbeing

At Citipointe, we balance challenge with students’ physical, spiritual and emotional wellbeing. Our safe and nurturing environment allows students to aim high so they can build the resilience they need for the future. Through leadership and international opportunities, every student can lead, follow and test where they fit in the world. Globality has long been a Citipointe distinctive, shown through our proud history of offering long and short stays for international students every year.

Unity is another powerful designing aspect of College life. A hallmark of a Citipointe education is the fulfilling, supportive relationships our students experience with their peers and teachers. Above all, we desire every student to know and understand God’s love for them, and to experience His leading and empowerment. Weekly year-level chapel services and devotions and regular whole-of-school celebrations are practical ways we help students to discover the purposes God has for them.

Imagine the right balance of challenge and nurture.
